Civil & Structural Engineering
Cost Engineering
Engineering Audits & Insurance
assessments
Project & programme management
Time, cost and quality control
management
Risk Management
Feasibility studies

Key Sector Experience

Residential
Commercial
Hospitality
Logistics
Infrastructure

Richard has held various positions, culminating in the establishment of DDR & Associates in 2008 and the further expansion of DDR into a group of multi disciplinary companies based locally and internationally.

Richard has experience in the built environment across all sectors, working as principal in multi disciplinary teams, and individually with other industry leaders and clients.

Key Experience

As both engineer and project manager, Richard has worked throughout the African continent on a multitude of projects.

With some 36 years in the engineering sector and some 28 years in the project management sector aligned with the built environment, Richard has gained valuable experience not only in the engineering, but also drilling deeper into projects understanding requirement such as statutory requirements, risk assessment and mitigation strategies, exchange and funding requirements and feasibility studies specified to client's requirements.

Richard works extensively in the Cold Chain Sector and with role players within this sector in an effort to improve best practices.

To this end he is a member of the Global Cold Chain Alliance (GCCA) and the Controlled Environment Building Association (CEBA-USA) and Thermal insulation products & systems association SA (TIPSASA-RSA)

Key Projects

Colcom Meats, Zimbabwe: Feasibility, civil and structural engineering to rehabilitation of existing pork processing plant

Grindrod Nacala, Mozambique: New cross docking facility, including warehousing, offices & container facility. Project Management, civil and structural engineering.

SGH Cold Stores, Port Elizabeth, Multi temp cold store with Steri chambers and associated office and staff facilities. Project management, civil and structural engineering.

Vector logistics. Various cold storage projects for the client on a national footprint. Project management, civil and structural engineering.
